Malak-Essam

PROFESSIONAL SUMMARY

Java Backend Developer with 1+ year of experience building RESTful APIs, microservices, and monolithic applications with Spring Boot. Skilled in Spring Security, JPA/Hibernate, PostgreSQL, and async messaging with RabbitMQ, with proven ability to independently design, build, and deploy production-grade backend systems – demonstrated through a full-stack real-time chat platform handling authentication, messaging, and live presence.

EXPERIENCE

Software Engineer

Arkan Tech

Oct 2025 – Present

Remote, Jordan

- Build and maintain RESTful APIs and microservice components in Java and Spring Boot for a production enterprise system, with clear service boundaries and reliable inter-service communication.
- Profile and optimize database queries and business logic, cutting response times on key endpoints by 20%.
- Implement secure data transmission and authentication flows to harden backend services against common vulnerabilities.

Additional Experience

- Full Stack Developer, Egyptian Army** (Compulsory National Service) – Jun 2023 – Jun 2024: Maintained web applications (PHP, JavaScript, HTML/CSS), fixed bugs, and supported deployments.
- Programming & Machine Learning Instructor, Freelance / Cairo University** – Jul 2025 – Sept 2025: Taught OOP, databases, and applied ML fundamentals through hands-on projects for 70+ students.

PROJECTS

Real-Time Chat Application

Personal Full-Stack Project

Backend: Java, Spring Boot, Spring Security, Spring Data JPA, WebSocket, STOMP, SockJS, PostgreSQL, JWT, RabbitMQ
Frontend: Next.js, Tailwind CSS

Backend

Frontend

- Built a full-stack real-time chat app with auth, messaging, friend management, and online presence.
- Developed 15+ RESTful API endpoints in Spring Boot for user management, authentication, and chat operations.
- Implemented real-time messaging with WebSocket/STOMP/SockJS, including typing indicators and presence tracking.
- Secured the backend with Spring Security and JWT (token refresh, BCrypt), and used RabbitMQ for async notifications and offline message queuing.
- Designed a normalized PostgreSQL schema, added JUnit/Mockito tests, and deployed backend to Railway (Neon Postgres) and frontend to Vercel with GitHub-integrated CI/CD.

EDUCATION

B.Sc. in Computer Science

Cairo University

2018 – 2022

Cairo, Egypt

TECHNICAL SKILLS

Backend

Spring Boot

Spring Security

Spring Data JPA

Spring MVC

Hibernate

REST APIs

WebSocket

JWT

Keycloak

RabbitMQ

Microservices

Languages & Databases

Java

SQL

PostgreSQL

MySQL

Database Design

Testing & Quality

JUnit

Mockito

Unit Testing

Integration Testing

Clean Code

SOLID

DevOps & Tools

Git

Docker

Maven

Postman

Linux

Frontend (secondary)

React

Next.js

TypeScript

CERTIFICATIONS

Linux Essentials
